## About This Content

### Hellenistic World Flavor Pack

The empire of Alexander is torn into separate kingdoms as former generals and functionaries squabble over his mantle. In Egypt, the famous Ptolemy holds the body of the great conqueror and the riches of the Nile. Seleucus has consolidated his power in Persia while Antigonos has built a base in Anatolia. The cruel Lysimachos dominates Thrace, and Macedonia, the heart

don't buy it paradox want to bleed you dry. This should have been in the base game. Day one dlc's even for a deluxe edition aren't acceptable anymore. People are getting angrier and angrier regarding this. Paradox will need to start thinking about there business model soon before people just stop playing entirely.

There isn't much here but It didn't cause me to much grief either.. It really doesn't bring anything. This DLC should be like 2-3 dollars at most.. A lot of good will has been built for me with paradox so for the first time ever I bought the deluxe edition.... Wow do I regret it. If only it didn't take over 2 hours to realize how broken and subpar this game was I would have refunded. I will not buy a single dlc from this game until they give plenty of free updates.. Ridiculously expensive for what it offers. I only bought it to support what I thought it will be a great game. I'll never buy anything from these guys again before it's thoroughly vetted by the community.. Greed Dlc. Took like 50% of games events as a dlc. Great going.

Would not as bad if base game had lots of flavor. But is is so lacking. Then have the guts to cut this much?. 18 bucks for Olympic event in Greece. Totally worth it!!.. Wow I pre-ordered the game for 14\$ more, but I get the deluxe features of like 4 events, 4 units and some on map monuments, I feel spoiled.. Paradox has admitted that the game is actually a full-priced re-skinned re-release of one of their 2008 titles, and not even one of their better received ones either. They took the code-base of EU:Rome, a minor spin-off title, gave it a new UI, promoted it heavily, and charged full price for it. That's just shameful. They've released a weak, paper-thin strategy game full of boardgame and mobile game mechanics, where you just wait for a timer and spend counters to achieve almost every mechanic.

This is embarrassing for a once-great developer like Paradox, I have to wonder who left the company. For all the provinces and different cultures and nations in the game, all of them play exactly the same and there's nothing even vaguely historically accurate or entertaining.. Johan Andersson dont know how to make game anymore

Here is the issue I have with Emperor Rome at the moment. Its extremely dry. It feels like there is a game to be found there but it wasn't completed. DLCs will fix this but honestly.... its a bit lazy to release the game in this state. I bought the deluxe version to see if this would fix anything. I don't know if it does to be honest. However I think this should be included in the base game. I love paradox as a company since they make the best games on the market but they are nickle and dimeing us so hard that the base game isn't any fun. I'm a huge fan but.... they need to address this somehow eventually or they'll end up like another EA.

I understand that the game takes lots of money to create and develop, and I appreciate that the DLC's make the company money. I'm willing to part with my money for games like Stellaris and CK2 but... I feel like there isn't lots of effort here. Stellaris felt like a huge undertaking and I understand the amount of money that went into it... maybe I'm just missing something?

There's also little things. For example I want to find all the pretenders or disloyal generals in the realm of one of my enemies. I can't find them straight up. I have to be constantly digging through menus and looking up what the problems are in the game. The UI could be better. I feel like there should be more decisions for various nations, more formations ect. For example Carthage has about 3 decisions and their traditions tree makes them weaker than most other factions.

I don't really know. I'm not a professional reviewer and I wouldn't recomend this game to anyone other than people who are fans of paradox like myself or people who really love roman history at the moment.

For me... its a yes. However if you are on the fence or you haven't played this type of game before try ck2 or stellaris instead.. Is it nice? Yes. Should it be in the base game already? Yes. Don't buy it unless it's on a 50%+ sale.. I purchased this upgrade for a more exciting Successor kingdom gameplay but got very limited new flavors. Not worth it, not worth the price at all.
